

DULA GUDETA

Full-Stack Developer | React · Node.js · Django

+251 922 497 661 | dulagudeta22@gmail.com | Addis Ababa, Ethiopia (open to Remote) | github.com/dulagudeta

PROFILE

Full-stack developer who has shipped and deployed multiple production platforms at Yanol Tech across hospitality and healthcare, owning each feature end to end: architecture, API design, database schema, and deployment. Proven ability to deliver complex systems on real deadlines, including three separate production integrations of the Chapa payment gateway for bookings, subscriptions, and QR-based ordering. Strong track record in freelance and client-facing delivery, translating business requirements from healthcare, hospitality, government, and media clients into working software.

CORE SKILLS

- **Frontend:** React, Next.js, Tailwind CSS, Framer Motion, Three.js/WebGL, responsive and interactive UI development
- **Backend:** Node.js, Express, Django, Django REST Framework, FastAPI, Python, RESTful API design
- **Databases:** PostgreSQL, MySQL, MongoDB, schema design for multi-tenant and admin-managed systems
- **Payments:** Chapa payment gateway integration across multiple production applications (booking fees, subscriptions, QR ordering)
- **Practices:** Git and version control, Postman, Docker, agile client communication, remote collaboration

RELEVANT EXPERIENCE

Full-Stack Developer | Yanol Tech

Feb 2026 – Present

- Built and shipped three live, production full-stack platforms for hospitality and healthcare clients, owning each feature end to end from React frontend through Node.js/Express or Django backend to database design.
- Developed two separate Hospital Management Systems covering patient records, appointment scheduling, doctor profiles, and staff workflows.
- Integrated the Chapa payment gateway into three production platforms, handling booking fees, subscription billing, and QR-based ordering.
- Worked directly with clients across hospitality and healthcare to translate business requirements into deployed features on live production deadlines.

FEATURED PROJECTS (Yanol Tech)

Noora Resort, Live, nooraresort.com

Full-stack resort management platform | React, Node.js/Express, MySQL, Three.js | Role: Full-Stack Developer

- Architected and built a complete resort management system, including hotel and room management, staff management, and a full CMS where every text and image on the site is editable from an admin dashboard.
- Built a smart QR-code menu with integrated Chapa payments, real-time kitchen order screens, and a customer feedback and ratings system.
- Built a 360-degree virtual tour of the resort using Three.js, along with an online booking flow and an AI-powered guest chatbot.

MediSchedule, Live, hospital booking platform

Hospital appointment booking system | React, Chapa | Role: Full-Stack Developer

- Delivered a polished, animation-driven React frontend for hospital appointment booking, built with Framer Motion and Tailwind CSS.
- Integrated Chapa payments to process patient booking fees and hospital subscription billing.

Yannet General Hospital Platform, Live, advanced hospital digital platform

Public patient site with internal admin backend | React/Next.js, Node.js/Express | Role: Full-Stack Developer

- Built a patient-facing platform with department and specialty pages, doctor profiles, appointment booking with document upload, and a branch locator.
- Built the internal admin backend used by hospital staff to manage doctors, departments, services, appointments, and site content.

- Implemented an AI-assisted symptom-to-department chatbot, a 360-degree virtual hospital tour, and multi-language support for English, Amharic, and Afan Oromo.

OTHER EXPERIENCE

Backend Developer Intern | Debo Engineering

Sep 2025 – Feb 2026

- Developed and maintained backend services and modular REST APIs with FastAPI and PostgreSQL.
- Implemented KYC and authentication modules, directly relevant to the auth and security work behind payment gateway integrations.
- Collaborated daily with a distributed team, including Git-based version control workflows.

Freelance Full-Stack Developer | Independent / Client Projects

2024 – Present

- Built and maintained client-facing React/Next.js frontends wired to REST backends for healthcare, construction, media, and government-sector clients.
- Delivered a Django REST Framework backend (Komii) for a community complaint management system. Repo: github.com/dulagudeta/komii_backend_API

FEATURED OPEN-SOURCE PROJECT

Komii Backend API, Django REST Framework

- A Django REST Framework backend for a community complaint management system, including models, serializers, permissions, and API endpoints for citizens to submit and track complaints.
- github.com/dulagudeta/komii_backend_API

EDUCATION

BSc in Software Engineering | Jimma University

2022 – Present

- Coursework in Data Structures, Design Patterns, Software Architecture, Databases, and Machine Learning, applied through hands-on full-stack projects.
